

Rapid SAP S/4HANA Migration for a Growing Energy Operator

AT GLANCE

A leading multinational organization in the energy and resources sector, recently expanded through acquisitions, urgently needed IT and process independence. Facing a four-month deadline and no TSA support, the company had to migrate from ECC to S/4HANA Private Cloud to ensure business continuity and scalability.

Applexus UK enabled a record-speed migration, delivering a future-ready ERP foundation that ensured Day 1 operational readiness and positioned the business for growth.

OBJECTIVE

To migrate from ECC to S/4HANA Private Cloud (RISE) in just four months by:

- Ensuring seamless Day 1 operations for finance, supply chain, joint venture accounting, plant maintenance, and logistics.
- Transitioning employees from a heavily customized ECC to a near-standard, scalable platform.
- Establishing IT independence post-acquisition without relying on TSA support.
- Laying a standardized digital foundation for future growth and innovation.

THE CLIENT

Global Energy & Resources Company

KEY BUSINESS METRICS

Migration completed in 4 months (vs. 9–15 months industry average).

Over 100,000+ data points migrated with high accuracy.

Zero downtime during transition.

Standardized digital core ready for future acquisitions and growth.

THE SOLUTION

- SAP S/4HANA Private Cloud (RISE)
- CeleRITE Accelerators

WHAT WE DID

Absoft (Applexus UK) collaborated closely with the client to drive a rapid and low-risk transformation, ensuring business continuity during the transition to S/4HANA. The approach was focused on speed, predictability, and minimizing customization while enabling a scalable foundation for growth.

Key actions included:

- Defined and executed a fast-track migration strategy tailored for a four-month delivery window.
- Leveraged CeleRITE accelerators to automate data mapping, migration, and validation—cutting effort and risk.
- Designed and deployed a near-standard S/4HANA solution to minimize customization and maximize scalability.
- Coordinated across multiple vendors and outsourced partners, aligning them under a single delivery framework.
- Implemented structured change management and training programs to support smooth adoption by employees.

KEY BENEFITS

 Record Speed: Migration completed in four months—far ahead of the 9–15 month industry benchmark.	 Operational Continuity: Seamless Day 1 operations across finance, supply chain, and plant maintenance.	 Accurate Migration: Over 100,000 data points migrated with integrity using CeleRITE accelerators.
 Future-Ready: Scalable, standardized S/4HANA foundation enabling business expansion.	 Collaborative Delivery: Unified delivery model between client, Applexus UK, and partners.	 Smooth Transition: Strong adoption supported by comprehensive training and change management.
